

PHOTONIS BECOMES STRATEGIC PARTNER OF JEDI

*Eurosatory, June 17 – Embargo until 17.00 CET
Mérignac, Berlin, Brussels, Paris, Rome, Tallinn*

Photonis and the Joint European Disruptive Initiative (JEDI) have announced that Photonis is joining JEDI as a Strategic Partner at the occasion of Eurosatory 2022. Photonis, a global leader in optical detection and imaging instruments, will benefit from JEDI's focus on nurturing emerging and disruptive technologies, from its deeptech ecosystem, as well as from its technology foresight capabilities.

The collaboration includes joint efforts in Moonshots on Space (most notably on detection and imaging applications), Digital, and Life Sciences (through Photonis expertise on medical instruments). Because of Photonis commitment to national security, it will also benefit from JEDI's policy insights related to defense and intelligence. More broadly, Photonis will leverage JEDI's know-how in interdisciplinary frontier research, such as Remote Sensing, Environmental surveillance, Forest Fires, and AI & Climate.

After the signing of the strategic partnership, Jérôme Cerisier, CEO of Photonis, declared "*Our partnership with JEDI deeply reflects the spirit of Eurosatory 2022: for strategic autonomy, it is critical that we Europeans do much better in breakthrough innovation — in photonics, in detection, in analytics and many other areas. Our collaboration with JEDI is both a proof of Photonis leading expertise on those, and of our commitment to constant seek of disruptive R&D and deeptech.*"

Mr. Loesekrug-Pietri, Chairman and Scientific Director of JEDI, stated "*Photonis unique expertise in the optoelectronics field will further deepen our technological expertise. Photonis joins the largest deeptech ecosystem in Europe and is another prime example of institutions keen to support JEDI and also tap into its massive technological brainpower. This strategic partnership will further support JEDI's mission to launch Moonshot GrandChallenges, to push further European technological leadership and sovereignty.*"

About Photonis - Photonis is a global manufacturer of electro-optic solutions used in the detection and imaging of ions, electrons, and photons. We develop, produce, and market innovative sensors for detecting and amplifying very low levels of light, charged particles, and radiation. Our products are used in a wide range of applications from night vision to analytical instruments, and even in nuclear reactors and warships. When you partner with Photonis, you will receive a custom detector designed to meet the specified performance and sensitivity criteria. Follow us on [LinkedIn](#).

About JEDI - The Joint European Disruptive Initiative (JEDI) is the European advanced research projects agency (ARPA) with a mission to bring Europe and free societies in a leadership position in emerging and breakthrough technologies. JEDI is launching [GrandChallenges](#) to push the frontiers of science & innovation, with a radical new method based on purpose-driven research, speed, full focus on excellence, interdisciplinarity, and bold 'moonshot' risk-taking. Powered by more than 4600 technology and scientific leaders from academia, industry and deeptech startups in 29 countries, JEDI is fully independent and financed by engaged foundations, companies, individuals and public institutions.
